

## WHAT IS A PULSATOR?

Want satisfying, reliable thrusting with or without a partner (and without tiring out your wrists)? Years ago, FUN FACTORY set out to make this wish come true and make a toy that would mimic the motions of partner sex. The outcome? The patented STRONIC technology: The pulsator was born.

### THE NEW KIND OF THRUSTING DILDO

With their satisfying weight for G-spot play, variety of thrusting and pulsating functions, and colorful, appealing designs, pulsators have become the go-to toy for pleasure product enthusiasts everywhere. Waterproof, discreet, and rechargeable, with a lock function for hassle-free travel, these are the first thrusting toys to promise a sense of luxury as well as play.

## PULSATOR VS. VIBRATOR

### WHAT'S THE DIFFERENCE?

Nope, pulsators and vibrators are not the same thing! Are you asking yourself "What is a pulsator?" or wondering what's the difference between a pulsator and a vibrator?

**Vibration** is caused by a weighted motor spinning very, very quickly inside the toy. Vibrators are great when you want a more intense, focused sensation and they're perfect for nerve-dense areas like the clit.

**Pulsators** thrust back and forth on their own, using a combination of strong magnets and German engineering. Their steady massaging sensation is perfect for G-spot play and feels a lot like the motions of a particularly skilled and tireless partner.

## WHICH PULSATOR FITS ME BEST?

Now that you know the difference between a pulsator and vibrator, it's time to look at how to choose the right pulsator for you. Every body is different, and you deserve a toy that feels amazing to you. There are a few different factors to consider when deciding on a pulsator of your very own: size, what kinds of sensations you already like, and what looks so fun or sexy that you just can't wait to use it.

**“I LOVE INTENSE, FOCUSED FINGERING.”**

**You want: STRONIC G**

Can't reach your own G-spot? No problem. The STRONIC G is as close as a toy can get to feeling like a partner who's really good with their hands. Its curve gives you the targeted massage your G-spot loves.

**“I LOVE COMBINING DIFFERENT KINDS OF STIMULATION.”**

**You want: STRONIC SURF**

Those ripples aren't just for show! The STRONIC SURF massages multiple hotspots with every thrust, building you up to an incredible orgasm: the G-spot, the sensitive vaginal opening, the internal clitoris, and many more.

**“INTERCOURSE IS THE BEST! IF I COULD BUY A REALISTIC SEX ROBOT, I WOULD.”**

**You want: STRONIC REAL**

The STRONIC REAL makes you feel like you're spending time with a creative and tireless lover. The shape you crave meets orgasmic stamina - up to two hours on a single charge!

**“I’M ALL ABOUT MINIMAL EFFORT.”**

**You want: THE BI STRONIC FUSION**

The BI STRONIC FUSION combines a pulsator with an external vibrator, so you can just lie back and enjoy. You can even save your favorite thrusting and vibration settings, so you don’t have to think about anything but fun.

## **WHAT SCIENCE SAYS ABOUT OUR PULSATORS**

In a study by certified German sexological bodyworker Mara Stadick, a group of 25 participants explored the effects of recurrent stimulation with a pulsator toy for at least 15 minutes per day - and after 4 weeks already reported some exciting results:

- Increased vaginal sensitivity, leading to more pleasure during penetration
- Getting turned on more easily
- Wanting sex more often
- Being more relaxed and more enjoying during sex with a partner, with or without a toy
